Hi jean: I understand you spoke with my epa colleague mary mears. She is going to try to find you an expert in our Washington office. it's quite a maze, but you might also try the United Nations Environmental Program in manhattan. I am afraid I don't have contacts there. best,
Judith Enck

HI...

I am so sorry to bother you today but I am doing a story today on Methyl Bromide itself...how it is being phased out...that it is a part of the Montreal Protocol...and that it is primarily used on crops in California and Florida.

Do you know anyone who I could interview on this?

Just thought I would ask you because you know a lot more people than I do in this area.

Thanks so much for yesterday...I am going to use more of your interview again tonight...you were really good.

Take care,

Jean

The application of methyl bromide was conducted on Wednesday March 18, 2015.

The paramedics were called Friday march 20, 2015 at 1am or 2am time frame

You will need to talk with the family spokesperson on the other matters.

Thank you so much.

I want to make sure I am correct on my facts:

They checked into the condo on March 14

So at 1:00 a.m. on March 15 they started feeling sick and thought they had food poisoning.

Were they rushed to the hospital on the 15th? Is that when Steve Esmond the father fell unconscious and the sons started having seizures?

MY BIG QUESTION IS THE DATES INVOLVED BECAUSE WE CONFIRMED WITH THE FAMILY THE FATHER'S UNCONSCIOUSNESS AND THE SONS SEIZURES.

Subject: "Terminix" SEC Form 8-K

As you requested. Fyi, the 8-K was actually submitted by the parent of Terminix, ServiceMaster Global Holdings, Inc.
